

Inside the MHS Construction

Photos by Ashley Nensel

Seniors Jeremiah Lam and Arvin Salas get ready to walk into the new building after school by putting on hard hats in what used to be a math classroom.

Glass walls are installed for natural light in the new building. “The building is designed to use daylight harvesting,” said Jim Feltz, project manager. “Any time it’s too bright outside, the lights in [the building] dim down. When it’s real dark outside, the lights come back up.”

On the tour
students walk
with Dr. David
Greenwood,
Science
Department chair.

This is one of two stairways leading to the third or first level in the new building.

Charles Nacion, sophomore, looks out over Mundelein while video taping the tour.

This is a lookout of what will be a courtyard.
